

ABSTRACT OF PROJECT

Submitted by: Dilsa Sajan
S10 INTMCA
No: 14

Topic: Gym Management System

Abstract: Gym Management system software is a complete solution designed for gym. It is easy to use and provides complete information about machinery and the coach's data is also saved. Other services provided by the gym can be handled by our system.

This application in future can be elaborated by providing diet information and personal training. This application will also notify the users about their fees and also notifies the gym owner about the payments.

Provide Fitness Equipment for rent.
